

Dear colleagues,

The Organizing Committee of the 13th School-Conference for Young Scientists "Current Topics in Organic Chemistry" are pleased to invite you to the School-Conference which will be held in Novosibirsk Academgorodok, Russia from 12th to 19th September, 2010. Traditionally, the School-Conference brings together participants all over Russia and FSU countries.

The Conference will feature Plenary and Invited Lectures, Oral Communications and Poster Presentations.

School-Conference will allow participants to establish contacts with colleagues from different organizations. The planned participation of universities and representatives of chemical companies will develop a closer relationship between education, science and business. Participation of leading scientists from Russia, Germany, Italy, Israel as plenary speakers will contribute to the professional growth of young participants.

The main topics of School-Conference will be:

- Structure and reactivity of organic compounds
- Molecular design and synthesis
- Polymers, organic materials and nanomaterials
- Synthesis of biologically active compounds and medicinal chemistry
- Modern physical methods of investigation and analysis of organic substances and materials
- Advanced trends in organic synthesis.

Participants of the School-Conference will take a part in workshops on modern equipment for microwave synthesis, synthesis in supercritical fluids, NMR, X-ray analysis, high precision gas and liquid chromatography. Within the School-Conference is planned to organize a video conference, free Internet broadcast of the most interesting lectures and communications. Selected communications will be published in scientific journals.

If You have any question please contact us:
